

# West Point Environmental Company Information Pack

# We Are West Point Environmental

Located in North Yorkshire, Westpoint Environmental is a leading waste management company with over 20 years' experience, specialising in waste management & industrial site services for the commercial and industrial sectors across the North East.

We have been supplying innovative solutions to deliver cost effective results for our customers, whilst always guaranteeing the highest levels of health, safety and customer service.

## Our Environmental Policy

As a waste management company, we are strongly committed to sustainable development by utilising an effective waste management strategy aimed at preventing pollution, safeguarding the environment and protecting public health and safety.

We are an innovative company who use the latest technology and practices and we will explore all options available to provide you with the most effective environmental waste management solution.

# Our Services

West Point Environmental provide a comprehensive range of waste management and industrial site services for the commercial and industrial sectors across the North East. See below for a list of our services designed to help you efficiently manage your waste.

## Waste Disposal

We deliver specialised waste recovery and disposal for both bulk and packaged waste throughout the North East, specialising in hazardous and non-hazardous waste management.

## Industrial Site Services

We provide expert and tailored industrial site services throughout the North East & Yorkshire, specialising in tank cleaning, decontamination & decommissioning & waste treatment services

## Water Jetting

We deliver specialised high pressure and ultra-high pressure water jetting services throughout the North East and Yorkshire, providing a fast, efficient cleaning and maintenance service.

## Tank Cleaning

We offer a comprehensive tank cleaning service for the internal and external of industrial tanks, throughout the North East and Yorkshire, providing a fast, efficient cleaning and maintenance service.

## Skip Hire

A comprehensive range of skips for the disposal of dry and non-hazardous waste from your business throughout the North East & Yorkshire, with an easy booking process and a fast, reliable service.

## Bulk Tankering

We provide a specialised bulk tankering service across the North East and Yorkshire, specialising in hazardous and non-hazardous liquid waste management for a number of industry sectors.

## Waste Electrical Disposal

We deliver a full Waste Electrical and Electronic (WEEE) collection, disposal and recycling service to businesses across the North East and Yorkshire for both non-hazardous and hazardous WEEE.

## Waste Consultancy

We offer a full waste management and minimisation consultancy service to businesses across the North East, helping businesses to reduce and manage the amount of waste they produce.

# Why West Point Environmental?

What makes West Point Environmental unique is our consultative approach to waste management and disposal. Our expert team listen to your requirements & work as part of your team to make informed decisions on the most cost effective waste management solution suitable to your business.

Whatever you need to know about waste management, the environmental professionals at West Point Environmental can offer the best consultancy and technical advice, as well as expert on-site teams, to help you make the right decisions for your business waste.

## **A Total Waste Management Service**

We offer a total waste management service that is both environmentally friendly and a cost effective and compliant solution tailored uniquely to your business.

## **Our Well Trained & Experienced Team**

Our dedicated fleet of specialist vehicles and equipment is managed by our well-trained & experienced team who are dedicated to providing the highest level of service.

## **Safe, Legal & Cost Efficient**

We are dedicated to not only disposing of your waste safely and to all current legislation but we also guarantee it is done in the most cost efficient manner for your business.

## **24/7 Emergency Response**

In the event of an emergency, we offer a 24/7 professional & reactive response service, providing a quick & efficient solution - minimising downtime and expense for your business.

## **Expert Advice & Knowledge**

Not sure how to dispose of your waste or need advice on how to minimise your waste production? Our expert team provide recommendations & advice covering everything from general waste management and recycling techniques to specialist processes such as hazardous waste collection, industrial cleansing & jetting, tank cleaning and sewage collection.
